PROFESSIONAL SUMMARY

Senior Full Stack Developer with **4+ years** of experience delivering secure, scalable web applications across real-time gaming platforms, B2B/B2C admin dashboards, and multi-tenant microservices architectures. Expert in React.js, Node.js, PostgreSQL, MongoDB, Redis, BullMQ, Socket.IO, Docker, REST API design, JWT/RBAC, and CI/CD pipelines. Actively expanding into Generative AI, AI Agents, LLM integration, and MCP (Model Context Protocol).

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer

Independent Contractor | Jan 2026 – Apr 2026

Independently delivered client web applications using React.js, Node.js, and MongoDB — owning requirements, architecture decisions, and on-time shipping without team support. Cut development time by ~35% by integrating Claude Code and GitHub Copilot for code generation, debugging, and refactoring. Managed end-to-end client communication across scope, feedback cycles, and final handoffs.

Gammastack (GrepRuby Webtech), India

Full Stack Developer / Solution Engineer | Jun 2022 – Jan 2026

Delivered 10+ production gaming platforms end-to-end using React.js, Node.js, PostgreSQL, and Socket.IO — achieving sub-second real-time state synchronization across concurrent multi-user sessions. Built 100+ RESTful APIs covering user management, wallet transactions, game operations, and real-time analytics. Containerized the full stack with Docker and established a GitHub Actions CI/CD pipeline, cutting deployment failures by ~80%. Managed AWS services including S3, CloudFront, EC2, Lambda, ECS, and CloudWatch across staging and production.

Gammastack (GrepRuby Webtech), India

Frontend Developer Intern / Solution Engineer | Jan 2022 – Jun 2022

Built modular, reusable React.js components with Redux for state management, reducing repeated component work and improving developer onboarding speed across the team. Improved page load performance by migrating legacy jQuery ad templates to optimized Vanilla JavaScript and React, removing render-blocking scripts and unused dependencies.

TECHNICAL SKILLS

Frontend: React.js, Redux Toolkit, Redux-Thunk, JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS, MUI, Bootstrap, PixiJS
Backend: Node.js, Express.js, Python, REST API Design, Socket.IO, WebRTC, BullMQ, Sequelize ORM, Microservices
Databases: PostgreSQL, MySQL, MongoDB, Redis
DevOps & Cloud: Docker, Docker Compose, Nginx, AWS S3, CloudFront, EC2, Lambda, ECS, CloudWatch, Git, GitHub Actions, CI/CD
Practices: Full Stack Development, HLD/LLD (System Design), Agile/Scrum, JWT Auth, RBAC, Performance Optimization, Code Review
AI & Emerging: AI-Assisted Development (Claude Code, GitHub Copilot), Generative AI, LLM APIs, RAG (Retrieval-Augmented Generation), MCP (Model Context Protocol), AI Agents, Prompt Engineering

PROJECTS

AfterHours / LiveChance – B2C Live Casino Gaming Platform

Stack: React.js, Redux, Node.js, Express.js, PostgreSQL, Socket.IO, Docker, AWS S3, Zego Cloud

Led modernization by upgrading legacy packages, improving asset delivery via S3, and implementing lazy loading to optimize performance. Integrated multiple game providers (Pragmatic Play, NetEnt, RedTiger, BigTime Gaming, Evolution) for live casino gameplay. Built a UTC-synchronized round system using atomic clocks to generate results in real time. Developed a live-host gaming module with Zego Cloud to enable large-scale user interactions and tipping functionalities.

Redes Holding / GreenCage / Living Pixels / Roliify – B2B Multi-Gaming Platform

Stack: React.js, Redux, Socket.IO, PixiJS, MUI, Bootstrap, Sequelize, Express.js | Team: 3

Built modular UIs for casino-style games like Dice, Blackjack, Roulette, Pilinko, and Video Poker. Created a dynamic admin panel for transaction tracking, round history, user/IP monitoring, and bet management. Integrated PixiJS-based slot games into React with a system to render build files dynamically. Used debouncing and throttling techniques for efficient bet placement and reduced server load.

PokerOne – Real-Time Multiplayer Poker Game

Stack: React.js, Redux, Node.js, Express.js, PostgreSQL, Sequelize, Socket.IO | Team: 4

Led a team of 4 to ship a production poker game with custom rules, spectator mode, and socket reconnection. Built room-based Socket.IO architecture for synchronized player state and turn logic with JWT-based session access control.

EDUCATION

Lakshmi Narain College of Technology Excellence, Bhopal

Bachelor's Degree – B.Tech in Computer Science and Technology | Aug 2018 – Jun 2022 | CGPA: 8.33

St. Joseph's Convent School, Kotma

High School – Secondary Schooling | Completed 2018
